

12 MONTH GERMANY

by Eva Wolf

SYNOPSIS

Different countries, different customs. Every year, young people from all over the world go to a foreign country to familiarise themselves with an alien culture. What they experience there is sometimes funny and sometimes tragic. But it is always about finding one's own borders and about finding a place for oneself among foreign people and their patterns of behaviour: what should be understood without having to say it, when people live together? What can be seen as normal behaviour, and what borders on being weird? 12 Months Germany accompanies four exchange students from three different continents living with their German host families allows us to share in their frustrations, their conflicts and in their successes while living in this foreign country. Kwasi from Ghana was sent by his mother on this journey into the unknown, but in the beginning, he is bored to death from dawn to dusk in the provincial East German countryside. Nairika from the USA is looking for real family...
