

# A SILENT ROCKUMENTARY - MARDI GRAS.BB

by Jonas Grosch

## SYNOPSIS

Being the world's first silent rockumentary, this movie reveals at its best the passion for making music! Mardi Gras.BB founded in Mannheim, Germany, is kind of a modern and intellectual brass band. After 20 years of making music on a very high level, due to financial failure they are close to give up. Together with the internationally acclaimed independent label Hazelwood they are producing their newest record, giving a last try to overcome problems of modern music business. Headwords like "illegal downloads" or "copyright debate" are just the tip of the iceberg. This conflict of traditionality vs. modernity is reflected in the style of the movie: A silent rockumentary.
