

AWARE - GLIMPSES OF CONSCIOUSNESS

by Frauke Sandig, Eric Black

SYNOPSIS

What is consciousness? Is it in all living beings? What happens when we die? And why do we seem to be hardwired for mystical experience? In these times of existential crisis, there has been an explosion of research into consciousness - and scientists are confronting the Big Questions. AWARE follows six brilliant researchers, approaching the mystery from radically different perspectives, from within and without: through high-tech brain research and Eastern meditation, by scientifically exploring inner space through psychedelic substances and by investigating the consciousness of plants.

with: Richard Boothby, Monica Gagliano, Roland R. Griffiths, Christof Koch, Josefa Kirvin Kulix, Matthieu Ricard, Mary Cosimano, Justine Fritz and special guest Mingyur Rinpoche
