

# DARK MATTER

by Viktor Brim

## SYNOPSIS

Quiet, dark shots of nocturnal fog, of a mine, a dump truck or a wreck, of huge earth craters and new surface contours created by excavation. Raw material extraction, economisation and exploitation of nature are the themes of this visual study. It's accompanied by an unobtrusive, but threatening and assertive sound that underlines the mystic quality of the images. Post-industrial landscapes become post-apocalyptic. (DOK Leipzig, Borjana Gaković)
