

GAMEZONE - IN THE WAKE OF CYBERSPACE

by Heide Breitel

SYNOPSIS

Playing in virtual cyberspaces has become ordinary for many families. Those are permanently available havens of any kinds of common problems, only one click away from reality. The cyberspace is clearly structured, excitingly designed and always new in another way. This documentary tries to find answers with the help of neuroscientist Prof. Dr. Gerland Huether and child and youth therapist Wolfgang Bergmann about the consequences of this development for mental, psychological and social evolution of children and what they are missing in the real world.
