

# INTENSIVE CARE

by Eva Wolf

## SYNOPSIS

This documentary allows an insight into the mental and emotional challenges the staff of an intensive care unit is facing on a daily basis, dealing with decisions that have far reaching consequences for their patients. Often it is the staff of the intensive care unit - the doctors and nurses - that are confronted with difficult ethical questions that their patients haven't yet had to consider. We regret, at this time, the film is only available in german Questions with no easy answers. How do we want to die, and how do we want to live?
