

# LOVE AND ENGINEERING

by Tonislav Hristov

## SYNOPSIS

Digital geeks looking for analogue love. One claims to have hacked love, can he help lonely engineers find real happiness? Atanas, a Bulgarian research scientist living in Finland, is trying to develop a scientific formula for mating and finding a perfect wife. He uses a group of geeky engineers as his guinea pigs; lectures them his ideas and sends them out to test them in practice.

Is it even possible or worthwhile to work your way through life 'scientifically'? Are rules of attraction scientific and if they are, do we really want to know them?

## FESTIVALS
