

# MODERN DINOSAURS

by Quinn Berentson, Mark Strickson, Penny Ashbrook

## SYNOPSIS

Modern Dinosaurs explores New Zealand's wildlife and extraordinary fossil record. Over six episodes we'll learn why creatures here are so unique. Each episode is led by scientists and adventurers who take us to remote and spectacular locations. We'll also explore the different landscapes and wildlife of Australia, New Zealand's nearest neighbour. Modern Dinosaurs considers evolution over millennia: how New Zealand was created and how it is changing. What will the future bring for today's animals?

## CAST AND CREW
