

NO ES FÁCIL - CHILDREN OF CHE

by Jakob Reinhart

SYNOPSIS

Every single person builds their own truth, carries their own inheritance with which one goes through life. The film deals with today's life on Cuba as it happens in the shadow of its political father Che Guevara. We see graffitis with his mottos at walls, the image of his face in living rooms, written on T-shirts or even onto whole houses. School kids dedicate their greeting 'Let us be like Che' to the icon - and it becomes apparent that people growing up in Cuba cannot escape this heritage. Che, his inheritance, and its reception in every one of its variations are a solid and formative part of Cuban everyday life across all generations. As much as this is apparent no one knows how this heritage will find it's continuation. The country is caught in standstill, its future locked in its own history. The legacy of Che threatens to perish in the generation conflict. 47min or 54min or 30min | HDV | original Spanish version with German or English subtitles...
