

# PUTIN'S PLAYGROUND

by Konrad Szolajski

## SYNOPSIS

A pair of Polish filmmakers travel around Central and Eastern Europe and explore cases of hybrid warfare in this region. They show their investigation and the evidence they managed to produce in Poland, the Czech Republic, Bulgaria, Moldova and Latvia - the countries of the post-Soviet camp. They do it in a cinematic way, creating a documentary in which they reveal what was supposed to remain hidden.

They discover that behind-the-scenes activities of Moscow special agents have been carried out regularly since at least 2013. The full-scale military invasion of Ukraine in 2022 is accompanied by intensive covert actions in neighbouring countries which are considered next targets. This seems to be a part of Putin's plan to regain the former Russian zone of influence in Europe. 2024 a.o.
