

SOLARTAXI - AROUND THE WORLD WITH THE SUN

by Erik Schmitt

SYNOPSIS

What began as a childhood dream is now an epic 18-month adventure that spans the globe. More than a few have embarked on an 'around the world' adventure; some have even completed it, but no one has ever done so powered exclusively by the sun. Meet Louis Palmer and his home-made SOLARTAXI. Full of surprises and apparently insurmountable obstacles, his journey begins in the summer of 2007. Along the way, Louis and his Solar-taxi meet princes, movie stars, politicians and scientists, but most importantly, he encounters ordinary people, showing them: A car with zero emission is not a dream. This film is proof. The first entirely green road movie.
