

# THE 4TH REVOLUTION - ENERGY AUTONOMY

by Carl-A. Fechner

## SYNOPSIS

"The 4th Revolution – Energy Autonomy", with fascinating images from countries all over the world, describes the development of the most crucial revolution in the history of humanity. A revolution that involves the rapid conversion of our energy supply to 100 percent renewable energies. The way for it is being paved by eight protagonists from different cultural backgrounds. Their projects include energy production, mobility, energy efficiency, solar architecture, energy storage, supplying the Third World with electric power, and fighting poverty... They all made up their minds long ago, seeing themselves as pioneers in the instigation of global change. ENERGY AUTONOMY. The fascinating concept of a solar world society - and it can be very rapidly realized.
