

THE WHALE AND THE RAVEN

by Mirjam Leuze

SYNOPSIS

A remote island in the Pacific, populated by wolves, ravens and two whale researchers. A small town with the promise of a second industrial boom. A First Nation village, torn between the wish to protect its territory and the pressure to cope with big investors. How are the people in the Canadian Great Bear Rainforest handling the arrival of the LNG industry? And what voice do whales have in the debate, when just the sound of tanker engines might be enough to drive them away? THE WHALE AND THE RAVEN is a story of humans and non-humans, united by a deep sea, separated by conflicting plans for its future.
