

# VOICES OF TRANSITION

by Nils Aguilar (Milpa Films)

## SYNOPSIS

This inspirational movie presents innovative and very concrete solutions to the food security challenges of our crisis-ridden times.

In impressive images, the film showcases community-led farming in Cuba, innovative woodland farming methods in France and the powerful transition movement in the UK, where communities are already making the transition to local resilience. The pioneers of this global movement all agree: By following this path, our more future-proof society will also bring about happier, more liveable local communities.

"Voices of Transition" is an "action movie" in the truest sense. It will inspire you to get up, join in and contribute to the transformation of our society!

## FESTIVALS
